## Science Options

### Environmental Science/Ecology

2 semester courses; 0.5 each

These courses are designed for ninth grade students who will take two half-year courses each for .5 credit. Ecology will include the study of the distribution and abundance of organisms, the interaction among organisms, and the interactions between organisms and their abiotic environment. This course will also investigate the flow of matter and energy among organisms and between organisms and their environment in an ecosystem. Ecology includes lab investigations to help students better understand the connections between living organisms and their environment. Environmental Science is a laboratory course which investigates the Earth and the environment around us. Physical science and mathematical applications are used to help students explore the answers to questions about their surroundings. Students will explore the economic impact of environmental decisions. Both courses, allow students to gain deeper understanding of the ecological and environmental standards tested on the Biology Keystone Exam, taken in 10th grade.

## Science Options

### Biology/Ecology

1 year, 1 semester  
1.5 total

This pathway is designed for highly motivated students with a strong interest in science and science related careers, such as medicine and engineering. The topics will be covered in more detail and at an accelerated pace. It offers an investigation of living things at the cellular and molecular (chemical) levels. This course is recommended for students interested in enrolling in Advanced Placement Biology as a junior or senior. Students taking this course will be taking the Keystone Biology Test at the completion of the course. There will be a limited number of sections available and will require an application, along with teacher input. **Students MUST also take ecology in 9<sup>th</sup> grade year as a semester course.**

## Things to think about...

- Be aware of course prerequisites, sequences, and recommendations.
- Explore future career options
- Make sure your choices reflect your busy lives! Take jobs, family obligations, and extracurriculars into mind. Don't overextend yourself!
- Talk with current teachers and counselor if you have questions about the level of a course to select and/or their suggestions
